

D.A.R.E Program Celebration

Deputy Drake will recognize all **D.A.R.E.** graduates in our school. He has requested that twenty square tables be placed side by side in a single row to accommodate all **D.A.R.E.** graduates. He also wants to decorate the tables with a red and white tablecloth symbolizing Drug Freedom.

Note: The tables used are of the same size with a length of 6 feet.

- A. What is the perimeter of the tablecloth that is needed in order to cover all the tables once they are placed together side by side?
- B. How many students can be seated altogether if every side of every table can seat only 3 students?
- C. What would be the tablecloth's area (in yards) once the tables are placed or lined up side by side?
- D. Assuming that you are 11 years old, for how many years would you had stayed drug free by the year MMLXXXIV?
- E. Explain why is it important to be drug free?
- F. Create a sing pledging your promise to be drug free for the rest of your life. You would share the sign with your family and friends.
