

Super Bowl XLII

In Mrs. Kasch's class students voted for their favorite team to win the XLII Super Bowl. $\frac{1}{2}$ of Mrs. Kasch's students voted for the New York Giants, $\frac{1}{3}$ of her students voted for the New England Patriots, and $\frac{1}{6}$ of her students voted undecided. If there are 4 students who voted undecided:

1. How many students are in Mrs. Kasch's class?
2. How many more students voted for the New York Giants than voting for the Patriots?
3. What percentage of students was undecided?
4. Write the Roman number XLII in standard form.
5. Write the decimal that represents the part of the students who voted for the Patriots.
6. Who do you think will be the XLII Super Bowl?
