

A Job Well Done by PTA

The BM Black Tie Dinner was a complete success with an attendance of 147 people who paid a total of \$ 727.65. The gala event was attended by parents and children from our BM family.

1. How many parents attended the event if $\frac{2}{3}$ of the attendees were parents?
2. How many children attended the event?
3. What is the ratio between the children and parents who attended the gala event?
4. How much money would PTA keep for future school activities if they paid the following expenses: \$158.35 for food; \$38.43 for cold drinks, and \$97.32 for decorations?
5. If you attended the event, pat yourself on the back and shout out HO, HO, HO!!!! OH!
